Bachelor of Science - Computer Science
Started 2025
- **University of Malta**
Software Test Automation and Continuous Integration - MQF6 - 2024
- **Hungarian University of Agriculture and Life Sciences**
Human Resources Consultant
2 Semester
- **Certified Tester Foundation Level**
2022 December
- **Eötvös Loránd University**
BA, Elementary Education and Teaching
Completed in 2016

TECH SKILLS

- Manual Testing
- Writing clear bug reports
- Selenium Webdriver and cucumber
- API Testing, Postman
- Basic Java programming
- HTML/CSS/Javascript
- Basic React
- Website testing
- Git
- Unit Tests
- Basic CI/CD

Agnes Ladoczki-Szabo

Over the past few years, I have placed a strong emphasis on expanding my IT knowledge. During this time, I gained hands-on experience through freelance manual testing projects, primarily via uTest.com and Testbirds.com. These projects involved executing test cases as well as exploratory testing, focusing on functional and usability aspects of various products.

In the past year, I completed the Software Test Automation and Continuous Integration course at the University of Malta. This course provided me with a solid foundation in test automation, including hands-on experience with tools such as Selenium WebDriver, Cucumber, and Postman, as well as an introduction to the basics of CI/CD pipelines.

I am currently pursuing a Bachelor of Science in Computer Science through remote learning, which predominantly requires weekend commitment. This flexible arrangement allows me to dedicate my time to a full-time junior testing or developer position where I can combine my acquired knowledge with practical experience and contribute to high-quality software development.

WORK EXPERIENCE

Freelancer Software Tester

2023 – 2025

- Executed manual testing projects for various software products via crowdsourcing platforms, specifically uTest.com and Testbirds.com.
- Performed functional and usability testing to ensure products met quality standards and user requirements.
- Executed defined test cases to verify specific software functionalities.
- Conducted exploratory testing to identify defects and assess the overall quality of products from a user perspective.
- Documented, tracked, and reported defects and anomalies found during testing.

Erste Bank Hungary | IT Recruiter

2020 – 2022

- Full service of IT recruitment from visiting candidates to issuing a tenders
- Supporting leaders in designing searches, selecting a candidate, monitoring the market
- Importing IT recruitment market trends and ideas
- Organizing participation in IT events
